

Economic and Financial Research Institute (8th floor Building 5)

Institute of Economics and Finance (Chinese full version

<http://iharbour.xjtu.edu.cn/jjryjy.htm>)

1. Introduction

The Institute of Economics and Finance is a comprehensive academic institution integrating scientific research, student training and social services. The Institute will closely follow the international academic frontiers, closely focus on the major national needs and the main battlefield of the national economy, and research and solve the "new The key socio-economic issues in the development of "industry, new finance, and new trade" provide relevant decision-making consultation, policy advice and high-end think tank services for the central and local governments and large enterprises and institutions.

The 4 research institutes (centers)

1. Professor Xiaohui Hou, Director of Institute of Finance and Finance, EMAIL: hxiaoh2008@mail.xjtu.edu.cn;
2. Professor Yang Xiuyun, Director of the Institute of Industrial Economics, EMAIL: yangxiuyun@mail.xjtu.edu.cn;
3. Professor Yuan Xiaoling, Director of the Institute of International Trade and Regional Economics, EMAIL: xiaoling@mail.xjtu.edu.cn;
4. Professor Zhang Qianxiao, Director of the Institute of Economics, EMAIL: zhqxiao@mail.xjtu.edu.cn.

2. Basic situation

The total area of the Economic and Financial Research Institute: more than 7,000 square meters, located on the 8th floor of Hanying Building, with a back-shaped structure and a simple style.

3. Resident scholars

There are 36 professors and 59 associate professors in the Institute of Economics and Finance. Among them are:

4. Platform and achievements introduction

1. Summary of research platform information
2. Summary of awards received in the past five years.

3. Summary of papers published in the past five years (published in the most famous journals).

5. Progress of school-local cooperation

Major issues currently striving for:

1. Independent external monitoring and evaluation consultation for the World Bank-financed Shaanxi Rural Community Development Project in Poor Areas. Introduction to this project is entrusted by the Shaanxi Provincial Foreign-funded Poverty Alleviation Project Management Center to conduct independent monitoring and evaluation of the World Bank-financed Shaanxi poverty-stricken areas. Total funding 2.65 million.

2. In 2018, poor counties in Shaanxi Province withdrew assessment-Chengcheng County and Heyang County.

Brief introduction

The project focused on the investigation and evaluation of poor counties in Shaanxi Province, with a project funding of 1 million.

3. Research on peak carbon emission forecast and low-carbon economy development route in Shaanxi Province. Introduction This project is entrusted by the China Clean Development Mechanism Fund Management Center to conduct investigations and research on carbon emissions and low-carbon economy in Shaanxi Province, with a total funding of 1 million.

6. Outlook

In the future, the Institute of Economics and Finance will closely follow the international academic frontiers, closely focus on the major national needs and the main battlefield of the national economy, achieve research commanding heights in emerging directions such as "new industries, new finance, and new trade", and enhance high-level think tanks that serve the country and localities Service capabilities. The Institute will "do not forget the original intention and keep the mission in mind", take talent training as the foundation, and high-level research as the starting point. Through the strategic measures of "going out and inviting in", the institute will deepen the cooperation of industry, university and research, and create an influential domestic and foreign. A platform for scientific research and education to continuously enhance the international influence of economics and strive to achieve world-class discipline development goals.

Institute of Marxism and State Administration (6th Floor Building 5)

(For Chinese Version visit: <http://iharbour.xjtu.edu.cn/mkszyyzglzyjy.htm>)

1. Introduction

Relying on the first-level master's degree, first-level doctoral program, and first-level post-doctoral mobile station of Marxist theory, the Institute of Marxism and State Governance has established institutions according to the model of research institute, research institute, and research center, and has six entity research institutes. (Institute of Principles of Marxism, Institute of Chinese Marxism, Institute of Ideological and Political Education, Institute of Modern History, Institute of Marxism and Social Development, Institute of Foreign Marxism), to establish several research centers and various research bases; All the staff of the research institute join different research institutes and participate in one or two research centers at the same time ; the research institute implements classified assessment on the research institutes and research centers to fully mobilize the research enthusiasm of relevant personnel. The establishment of the Institute is conducive to gathering talents, conducive to "team warfare", conducive to the improvement of the overall strength of the discipline, conducive to the realization of interdisciplinary and knowledge integration, conducive to promote the Marxist theoretical disciplines to produce a batch of original academics across the country The results, closely integrated with the country's major needs, promote the application of research results in the main economic battlefield, and produce a batch of economically beneficial and exemplary industry-university-research cooperation results.

Research Institute Orientation: Establish research institutes and research institutes in accordance with the requirements of "facing the frontiers of world science and technology, facing the main economic battlefield, and facing major national needs", focusing on the latest achievements of the theoretical system of socialism with Chinese characteristics since the new era and major practical issues of contemporary China's reform and development Carry out key research and form landmark research results.

1. Build a first-class Marxist theoretical research team;
2. Form a first-class Marxist theoretical talent training;
3. Produce first-class scientific research results of Marxist theory;

4. Form a first-class international academic exchange and cooperation;
5. Form a first-class theoretical voice and social service.

2. Research team

The Institute of Marxism and Governance has a total of 71 people, including 17 professors, 27 associate professors, and 32 doctoral supervisors. Existing central, the Ministry of Education Marxist theoretical research and construction experts 1; One member of the Subject Evaluation Group of the State Council; A special judge of the Academic Degrees Committee of the State Council; Member of Social Science and Technology Commission of Ministry of Education; Enjoy two special experts of the State Council; National management office expert 1 person; The Ministry of Education Ideological and Political Theory Teaching Steering Committee 3 (Vice Chairman 1); National ideological and political education in the young outstanding talents support program selected one person; Outstanding young and middle-aged ideological and political theory teachers of the National University Program selected 4; Ideological and political theory class in colleges and universities across the country has 1 role model and 5 role models. Ideological and political theory of the national college teaching experts 2; Shaanxi Province Sanqin talent 7; Shaanxi Province, a group of six talents; Baoshan Iron and Steel Award winners 3, Wang Kuancheng Education Award winners 6; School youth top talent 2 people.

Institute set up 6 key research teams:

1. Ideological and Political Education of College Students and Research Team of Contemporary Trends of Thought;
2. Marxist Theory and Social Engineering Research Group;
3. Marxist Political Economy Research Team;
4. Marxist and Contemporary Chinese Political Research Group;
5. Marxism and International Studies Group;
6. The Communist Party of China and the Research Team of Northwest.

3、 Scientific research achievements

In the past five years, it has presided over three key research projects of philosophy and social sciences of the Ministry of Education. Four key projects and 18 general projects of the National Social Science Foundation of China; Ministry of Education Humanities and Social Sciences Research Project 23. Published 48 special. Published 500 articles, including 1 SSCI journal paper, 50 authoritative journal papers, and 280 CSSCI journal papers. Won 6 Outstanding Achievement Awards of Philosophy and Social Sciences of Shaanxi

National Research Projects Undertaken in the Past Five Years (Part)

High Level Academic Papers Published in the Last Five Years (Part)

4、 Theoretical advocacy and social services

In recent years, the Institute has promoted the popularization and popularization of Marxist theory through theoretical interpretation and publicity. Published more than 200 theoretical explanation articles in newspapers and online media such as "People's Daily", "Guangming Daily" and "Economic Daily". Among them, since the 19th National Congress of the Communist Party of China, it has focused on studying, explaining, and propagating Xi Jinping's new era of socialism with Chinese characteristics. , Published more than 60 theoretical explanations and publicity articles. In addition, take the initiative to report various public opinion information, and continue to promote the construction of think tanks. In recent years, the Institute submitted various reports recommended by the central and local Party and government departments to adopt 60 more than papers, including 3 manuscripts Secretariat of the CPC Central Committee adopted a comprehensive information room. "The teaching effect of ideological and political theory courses in colleges and universities urgently needs to be improved" was published in the Daily News of the Central Office; "Introduction to the 40th Anniversary of Reform and Opening-up in the Current Ideological and Theoretical Circles " was approved by the Ministry of Education.

5. Foreign cooperation

With the goal of building a first-class discipline, the Institute adheres to the principle of combining "inviting in" and "going out" to carry out multi-level, multi-channel, multi-field, and all-round international cooperation and exchanges to enhance the internationalization level and social impact of the discipline force. Annual funding 2--3 doctoral out exchange of learning, funding 2-3 young

teachers go out to participate in international conferences. Established the "China Reform and Development " postgraduate training program for international students.

In order to promote the connotation construction of the innovation port, the Institute will continue to promote the international exchange and cooperation of disciplines, aim at the international frontier of discipline development, make full use of multiple resources, comprehensively promote the internationalization of discipline development and talent training, and stand in the development of world disciplines. Leading the world in disciplines.

Institute of Humanities and Social Sciences (5th floor Building 5)

(For Chinese full version visit: <http://iharbour.xjtu.edu.cn/rwyshkxyjy.htm>)

Institute location:

Han Ying Building 4 floor: 5-4089 to 5-4091, 5-4100 to 5-4104, 5-4110 to 5-4137 room

Director of the Institute of Positive Social Sciences:

Bian Yanjie

E-mail: ybian@xjtu.edu.cn

Introduction.

The Institute of Humanities and Social Sciences relies on the fast-developing School of Humanities and Social Sciences, which is based on the practical experience of the world and the human culture. It follows the construction goal of "facing the frontiers of science and technology in the world, facing the main economic battlefield, and facing the major needs of the country" to demonstrate social science research. Four research institutes, including the Institute of Philosophy and Culture, the Institute of Literature and Film Communication, and the Institute of Art Creativity and Cultural Industry, serve as platforms to study and solve important social, ideological, literary, cultural, psychological and artistic issues in social development. Explore academic frontiers, practice discipline integration, promote think tank construction and achievement transformation, and provide ideological, spiritual and cultural support for creating a better life for people.

Institute positioning and structure

The Academy of Humanities and Social Sciences is an interdisciplinary and comprehensive academic institution integrating scientific research, student training and social services. It will focus on discipline construction, keep up with the international academic frontiers, and closely focus on the major national needs and the main battlefield of the national economy. Solve key social, ideological, and cultural issues in social transformation, play the role of think tanks, and provide relevant decision-making consultations and policy recommendations for the central and local governments and enterprises and institutions.

Information of the person in charge of the institute:

Dean of the Academy of Humanities and Social Sciences:

Li Liming

E-mail: liliming@mail.xjtu.edu.cn

There are four research institutes:

1. Empirical Social Science Research Institute

Research direction:

Under the background of the intersection of sociology, economics, and public management, carry out theoretical and empirical research on relational sociology with Chinese characteristics, and carry out research on economic and social relations, social stratification and mobility, and social differentiation and integration in a transitional economy. The goal of Sociology of Relations is international frontier academic research, a national initiative, and world-class; research on issues in transitional society and social governance. The goal is to study major theoretical and practical issues of national development. The research level, comprehensive strength, and research results nationwide Forefront. The goal of social psychology is to build social psychology into the highest in the west and a well-known discipline in China. The key directions are: moral psychology; network and health psychology.

2. Institute of Philosophy and Culture

Research direction:

The Institute of Philosophy and Culture has a well-established talent training system for undergraduate, master, doctoral, and postdoctoral mobile stations, and has a doctoral degree authorization point for the first-level discipline of philosophy. It has formed strong research in the basic theories of philosophy, information philosophy, and body philosophy. Directional advantage. The goal of the Institute of Philosophy and Culture is first, to actively explore the transformation mechanism of scientific research achievements in philosophy, and to gradually build and apply for provincial and national philosophy think tank bases; second, to rely on the promotion of the innovation port and rely on the Institute of Humanities and Social Sciences The platform vigorously promotes the development of the discipline of philosophy, and finally turns the discipline of philosophy into a national key first-level discipline.

Institute location:

Han Ying Building 4 floor: 5-4014 to 5-4023, 5-4029 to 5-4040 room

Director of the Institute of Philosophy and Culture:

Han Pengjie

E-mail: zhujinping200691@126.com

3. Institute of Literature and Film Communication

Research direction:

The Institute of Literature and Film and Television Culture is a research and teaching institution that integrates academic research, talent training, and the transformation of scientific research results. The institute strives to promote the humanistic tradition of Jiaotong University, based on traditional Chinese culture, is committed to innovative and international academic research, pays attention to the internal humanities and interdisciplinary exchanges between the humanities and natural sciences, and focuses on the transformation of traditional culture and contemporary cultural industries Based on the model of industry and social services, combined with the discipline

characteristics of strong professional practice, the research and practice of “Industry-University-Research” linkage is realized.

Institute location:

4th floor of Hanying Building: 5-4081 to 5-4086, 5-4092 to 5-4099 rooms

Information of the person in charge of the institute:

Director of the Institute of Literature and Film Communication:

Zhang Yong

E-mail: zhyong_xjtu@163.com

4. Institute of Art Creativity and Cultural Industry

Research direction:

Relying on the Joint School of Design, the establishment of a "one-to-many" international cooperation model based on the cooperation with the Politecnico di Milano and incorporating other internationally renowned universities. Bring huge innovations to teaching and scientific research. With industry and social services as the model, combined with the discipline characteristics of strong professional practice, it realizes the linkage of "production, study and research".

Institute location:

Han Ying Building 4 floor: 5-4051 to 5-4059 room

Information of the person in charge of the institute:

Director of the Institute of Art, Creativity and Cultural Industry:

Zhang Fuhu

E-mail: zfh1369@163.com

Development Goals

1. Short-term target 2020 Nian

Sociology has become a domestic first-class discipline, and other disciplines are planned to be well-known domestic disciplines with distinctive characteristics.

2. The medium-term target 2025 Nian

Philosophy was built into a well-known discipline in China, and other disciplines were built into disciplines with the characteristics of Jiaotong University.

3. The long-term goal of 2035 Nian

Sociology has become an internationally influential discipline, philosophy has become a domestic first-class discipline, and other disciplines have become domestic well-known disciplines.

Integrate advantages and achieve fruitful results

The humanities and social subjects of Xi'an Jiaotong University have a long history, with a history of more than 100 years. The Institute of Humanities and Social Sciences integrates strong faculty and scientific research capabilities, conducts research around the frontier issues of the basic theories of humanities and social sciences, actively explores the development rules and achievement transformation mechanisms of the humanities and social disciplines, and focuses on the interdisciplinary integration of the humanities and natural disciplines, and has achieved fruitful results. Scientific research results. Since 2012, it has undertaken 321 scientific research projects and received 30.95 million yuan in scientific research. Among them, there are 4 national key research projects, 1 special project of the 19th National Social Science Foundation of China, 7 key projects of the National Social Science Foundation, 37 general projects of the National Social Science Foundation, 1 National Art Foundation, and National Natural Science Foundation of China 5, 33 humanities and social science research projects of the Ministry of Education, 1 special commissioned project of the State Administration of Radio, Film and Television, and 44 Philosophy and Social Science Funds of Shaanxi Province. 690 papers published in academic journals above CSSCI, of which 321 are SSCI, SCI, A&HCI and authoritative journals, CSSCI383 journal papers; 348 academic monographs and textbooks published.

Learn from others' strengths and strive to be first-class. The Institute of Humanities and Social Sciences is determined to forge ahead and has talented people. It has formed a talent team with leading scholars, lecture professors, outstanding talents in the new century of the Ministry of

Education, and top-notch young talents to form a talent team, emphasize construction, strengthen the team, make up for shortcomings, and work hard" Create a lively situation where everyone can become a talent and everyone can show their talents to the fullest", and help the construction of "double first-class" and comprehensive "double first-class" talent training in humanities and social sciences.

Jinhe Economic Research Center (5th floor Building 5)

(For Chinese full version visit: <http://iharbour.xjtu.edu.cn/jhjjyjsx.htm>)

1. Introduction to Research Center

Jinhe Economic Research Center (hereinafter referred to as research center or center) is a teaching and research center jointly established by Xi'an Jiaotong University and well-known scholars on both sides of the Taiwan Strait. With an international talent training model and strict scientific research training methods, it is committed to fostering profound ideas and innovations Ability, pursuing economic talents who can help the world, prosper the country and the people, promote the continuous development of theoretical and applied economics disciplines with Chinese characteristics, and build it into a research palace in the field of economics in China and the world.

2. Basic situation of the research center

The research center covers an area of about 1,300 square meters and is located on the west side of the fifth floor of No. 5 giant structure . Based on the current status of the research center, the organization structure of the center adopts the form of integrating institutes and institutes without a research institute. The director of the center is Professor Guo Yusen.

3. Faculty members settled in the research center

The main faculty team of Jinhe Center is composed of permanent faculty members and overseas visiting professors: the permanent faculty team consists of center director Professor Guo Yusen,

co-founder Professor Hu Chuntian, deputy director Associate Professor Zeng Weihong and 18 other teachers, totaling 21 people. Among them, there are 5 professors, accounting for 23.8%; 4 associate professors, accounting for 19%, and 12 lecturers, accounting for 57.1%. There are 14 teachers with doctoral degrees from well-known overseas universities, accounting for 66.7%, and 5 foreign teachers, accounting for 23.8%.

Guo Yusen

Director of Jinhe Center, Xi'an Jiaotong University, PhD supervisor, graduated from University of Chicago. Research Field: Industrial Organization Theory, Information Economics

Hu Chuntian

One of the founders of Jinhe Center of Xi'an Jiaotong University, Ph.D. in Economics from Princeton University, Chair Professor of Xi'an Jiaotong University, Ph.D. Supervisor, former researcher of the Institute of Social Sciences, Academia Sinica, Professor of Economics, Taiwan Culture University

Research fields: international financial theory, macroeconomics

Zhang Guoping

Chair Professor, Jinhe Economic Research Center, Xi'an Jiaotong University, Ph.D. Supervisor, Ph.D. from University of Pennsylvania, Former Professor, Department of Metrology, Finance and Finance, Tsinghua University, Hsinchu, Taiwan

Research fields: financial derivatives pricing, corporate finance, industrial economics

Zeng Weihong

Deputy Director of Jinhe Center, Xi'an Jiaotong University, PhD supervisor, Ph.D. in International Political Economy, University of Tsukuba, Japan

Research Fields: Health Economics, Quantitative Economics, Aging and Health

Yu Weihua

Associate Professor, PhD Supervisor, PhD in Economics, Xi'an Jiaotong University

Research Field: History of Econometrics, Global Climate Change

Zhou Xiangyi

Associate Professor, PhD Supervisor, PhD in Economics, Xi'an Jiaotong University

Research fields: Empirical corporate finance, applied microeconomics, venture capital and private equity investment

Zhang Yi

Associate Professor, PhD Supervisor, PhD in Economics, Utrecht University, Netherlands

Research fields: multinational company research, international trade and investment, regional economic development, institutional economics

Zhao Yuan

Lecturer at Jinhe Center of Xi'an Jiaotong University, PhD student at Xi'an Jiaotong University, Master of University of Leicester, UK

Research fields: resource and environmental economics, urban household energy consumption

Qin Botao

Lecturer, master supervisor, Ph.D. in Economics, University of Wyoming

Research Fields: Environmental and Resource Economics, Industrial Economics, Experimental / Behavioral Economics, Applied Microeconomics

Horse mustard

Lecturer, master's supervisor, PhD in Economics, Indiana University

Research Fields: Health Economics, Medical and Health Policy, Applied Econometrics

Chen Xiaodong

Lecturer, Master Supervisor, PhD in Economics, Cardiff School of Business, Cardiff University, UK

Research fields: Finance and endogenous economic growth, mathematical modeling of Chinese and foreign political comparison, Indirect Inference measurement method

Hee Yeul Woo

Lecturer, Korean, PhD in Economics, University of California, Davis

Research fields: game theory, micro theory, political economy

Long Long Shi

Lecturer, PhD in Economics, University of Oklahoma

Research Fields: Industrial Organization, Applied Microeconomics, Applied Econometrics

Bibaswan Chatterjee

Lecturer, Indian, PhD in Economics, State University of New York at Buffalo

Research fields: Corruption, applied theory, law and economy, economic growth

Jaeyoon Kim

Lecturer, Korean, PhD in Economics, Virginia Tech

Research fields: macroeconomic models, time series analysis, empirical macroeconomics

Goeun Lee

Lecturer, Korean, PhD in Economics, Korea University

Research fields: econometrics, applied econometrics, panel data model, sample selection

Li Jing

PhD in Economics, Tilburg University, the Netherlands & Turin University, Italy

Main research areas: financial measurement, model uncertainty, asset pricing theory, pension fund investment.

Hu Lin

Lecturer, PhD in Economics, University of Adelaide, Australia

Research fields: government and institutional theory, political economy, microeconomics, game theory

Li Yingxue

Lecturer, PhD in Economics, University of California, Davis

研究领域：实验与行为经济学、博弈论和微观理论。

Research Platform Construction

In the past five years, the teachers and students of Jinhe Center have published 48 high-level academic papers, undertaking 3 national projects, 5 provincial and ministerial projects, more than 1 million funds, 1 provincial teaching achievement award, 1 provincial scientific research achievement award, and three school-enterprise cooperation bases under preparation. 2, the graduate student curriculum 2, the foreign student curriculum schedule 5, the research platform construction situation in the past five years, Jinhe Center teachers and students published a total of 48 high-level academic papers, undertake 3 national projects, 5 provincial and ministerial projects, more than 1 million yuan, 1 provincial scientific research achievement award, and three school-enterprise cooperation bases in preparation. 2. A high level of research starting point, a good academic atmosphere attracts a large number of famous scholars at home and abroad to visit the center and make academic reports every year. Since its establishment, Jinhe Center has held more than 10 large-scale academic conferences (more than 100 people) and more than 100 high-quality academic lectures. Relying on good cross-strait academic exchanges and actively carrying out international academic exchanges, overseas (overseas) scholars visit about 30 people every year. In 2016, Jinhe Center hosted the "Forum on World economy and Cross-Strait Innovation and Development under the new situation", which has more than 240 scholars at home and abroad. Professor Zhang Wuchang, a famous economist who visited and maintained good interaction with the center, visited Xi'an Jiaotong University in November 2007 and April 2008, respectively, at the invitation of Jinhe Center. Academic lectures and a week-long lecture on how to learn Economics well. Professor Huang Youguang, academician of Australian Academy of Social Sciences, visiting professor of Jinhe Center of Xi'an Jiaotong University, worked at Jinhe Center for 1-2 months from 2009 to 2019, engaged in academic exchanges and taught students. Professor

Diao Jinhuan, an internationally renowned master of statistics and academician of the Taiwan Academy of Chinese Studies, visited Jinhe Center in 2010 and gave an academic report. Jinhe Center encourages academic discussions and academic exchanges between teachers and students. Jinhe Center Economics Workshop has held more than 120 consecutive sessions since 2013. Young scholars from more than 20 famous universities and scientific research institutions at home and abroad, such as Tsinghua University, Peking University, Nankai University, Xiamen University, Southwest University of Finance and Economics, Norwegian Institute of Nature, and University of Oklahoma, USA, have visited and delivered academic reports. 6. Looking forward to the new historical starting point, relying on the innovative port in western China, Jinhe Economic Research Center will continue to uphold the original intention of "running the purest economic educational institutions in China and cultivating elite economists committed to China's national wealth", giving full play to the advantages of scholars at home and abroad in running schools together, guided by the cultivation of economists with profound ideas and innovative abilities, and shouldering the historical mission entrusted to us by the great powers. We will promote the development of theoretical and applied economics with Chinese characteristics.

5. Institute of Civil and Commercial Law

Director Professor Wu Guozhe EMAIL guozhewu@163.com

6. The Legal Policy Collaborative Innovation Center of the Silk Road Economic Belt

Director Professor Shan Wenhua EMAIL shan@mail.xjtu.edu.cn

2, the Location

The total area of the Law Research Institute: 4400 square meters, located in Building 5 (a huge structure).

3, settled scholars

A total of 14 professors, 22 associate professors, and 16 assistant professors have settled in the Institute of Law. Among them: 2 national-level talent plan candidates; 2 special allowance experts from the State Council; 3 new century talents from the Ministry of Education; 2 "Humanities and Social Sciences Talents" in Shaanxi Province, 1 "Leading Scholar" in Shaanxi Province, and Young Talents in Shaanxi Province There is 1 selected candidate.

4, the platform and the results presentation

1. Summary of research platform information
2. Summary of awards received in the past five years
3. Summary of papers published in the past five years (published in the most famous journals)

5, the school to collaborate progress

Major issues currently striving for:

1. A major research project of the Humanities and Social Science Research Project of the Ministry of Education: Research on promoting the construction of the Silk Road Economic Belt, chaired by Professor Shan Wenhua; Project funding: 800,000 yuan.
2. Major project of the National Social Science Foundation: Research on the special system for the protection of traditional Chinese medicine knowledge, chaired by Professor Ma Zhiguo; project funding: 800,000 yuan.
3. Major project of the National Social Science Foundation: Research on the Innovation of Network Social Governance, chaired by Professor Ma Minhu; project funding: 800,000 yuan.
4. Major project of the National Social Science Fund: Research on the rule of law thought of the Party Central Committee since the 18th National Congress of the Communist Party of China, led by Professor Wang Baomin; project funding: 400,000 yuan.
5. Key project of the National Social Science Fund: Research on the construction of the Silk Road Economic Belt and China's opening-up strategy, chaired by Professor Wang Jiangyu; project funding: 320,000 yuan.
6. Preliminary work of Shaanxi Province "One Belt One Road" legal service function zone project, presided over by Professor Shan Wenhua; project funding: 500,000 yuan.
7. The Supreme People's Court "One Belt One Road" country international investment case study , led by Professor Li Wanqiang; project funding: 450,000 yuan.
8. Credit system construction project of Xi'an Transportation Bureau, chaired by Professor Ma Zhiguo; project funding: 1.8 million yuan.

9. Taobao (China) Software Co., Ltd. network social governance related issues research project contract, led by Associate Professor Wang Yue; project funding: 450,000 yuan.

10. Research on the institutional framework of the Regulations on the Protection of Traditional Chinese Medicine Knowledge of the State Administration of Traditional Chinese Medicine, chaired by Professor Ma Zhiguo; project funding: 300,000 yuan.

11 study Alipay (China) Network Technology Co., Ltd. Network credit problem areas of criminal law, Professor Su Qingfu preside; project funding: 30 million.

12, Alibaba (China) Co., Ltd. Network Products and Services Compliance risk analysis study, Professor Wang Yuefu preside; project funding: 30 million.

6. Outlook

The Institute of Law is determined to build a leading domestic and foreign law research center, a high-end talent training base and a high-end think tank with Chinese characteristics, and support high-quality teaching and high-end think tank services with leading scientific research results. The Institute strives to build a legal and interdisciplinary research platform that serves the major needs of the country and faces the frontiers of science and technology in the world and the main battlefield of the national economy. It cultivates elite talents with global vision and family and country sentiments, and contributes legal wisdom and power.

XJTU Institute of "The Belt and the Road" Pilot Free Trade Zone (9th floor Building 5)

(For Chinese full version visit: http://iharbour.xjtu.edu.cn/a_ydyl_zymysyqyjy.htm)

Floor location:

The Research Institute of the "One Belt One Road" Free Trade Pilot Zone of Science and Technology Innovation Port in Western China is located on the 9th floor of Building 5.

1. Introduction to the Free Trade Institute

The Western China Science and Technology Innovation Port "One Belt One Road" Free Trade Pilot Zone Research Institute is a new type of think tank planned and constructed by the school,

with the purpose of "serving Shaanxi, based in the west, facing China, and global vision", with the strong support of the provincial party committee and government, Integrate high-quality intellectual resources at home and abroad , and explore the formation of a "multilateral, open, innovative, and shared" political and intellectual symbiosis, and an ecological platform for resources and intelligence through institutional innovation and task guidance.

Centering on major issues such as the "One Belt and One Road" initiative and the development of the Shaanxi Pilot Free Trade Zone, the Free Trade Institute conducts policy consultation and strategic research, professional personnel training, social services, and cultural exchanges, and undertakes the functions of national ministries, provinces and municipalities. There are more than 90 departmental topics, a research report of more than 1 million words has been formed, and more than a hundred times of seminars, exchanges and expert consultation have been participated.

The free trade institute is headed by the vice-president Professor Xi Guang concurrently as the dean, and the Social Science Division is the management unit, with 3+X research centers under it. Among them, the Service Trade Research Center focuses on building international economic and service trade theories and strategic frameworks that reflect Chinese characteristics, and dynamically grasps the development trend of the world's service trade with China and the internal laws of economic development; the Government Governance and Innovation Research Center is dedicated to government governance And innovative theoretical and practical research, exploring the reform and innovation of the Shaanxi Pilot Free Trade Zone in terms of government functions, operating mechanisms, administrative reforms, and government governance; the Legal Governance Research Center is engaged in research on the policies, laws and governance mechanisms of the Pilot Free Trade Zone , To actively provide decision-making suggestions to relevant units for the establishment of the rule of law in the Shaanxi Pilot Free Trade Zone, conduct exchanges and cooperation and business training.

2. Research results

1, 2018 Nian 12 Yue 22 Ri, free trade hospital with "A university think tank zone" status was selected Chinese think tank index (CTTI) source think tank, is also the only school named CTTI think tank hundred list of university institutions.

2 , 2017 Nian 11 Yue first published in "The Sound of Free Trade Institute of the" experts regularly Selected original articles or hot information, publishing "into China (Shaanxi) free trade test area"

and other topics of books 13 book, self-Trade construction personnel provide reference reading materials.

3. The relevant research results of the Free Trade Institute are submitted to the relevant national, provincial and municipal departments for reference through channels such as the "Information Special Report" and "Decision Recommendations" (Special Issue of the Research Institute of Xi'an Jiaotong University Free Trade Zone), and have been approved by provincial and ministerial leaders. The implementation of the concept of "legal affairs zone" and the construction of an intellectual property securitization exchange has effectively promoted key tasks in the pilot free trade zone.

3. Social services

1. In line with the concept of "openness, tolerance, innovation, coordination, and complementarity", hold (undertake) two consecutive "China (Shaanxi) Pilot Free Trade Zone Development Forum" to build for government, industry, education, research, and use Frontier high-end think tank exchange platform.

- In the first forum in 2018 , Professor Huang Maoxing, a representative of the National People's Congress, Dean of the School of Economics of Fujian Normal University, and Dean of the Comprehensive Research Institute of Fujian Free Trade Zone, and Professor Feng Zongxian, an expert of the Free Trade Institute of Jiaotong University, were invited to give keynote speeches;
- At the second forum in 2019, Lin Yifu, member of the Standing Committee of the National Committee of the Chinese People's Political Consultative Conference, deputy director of the Economic Committee, and dean of the Institute of New Structural Economics of Peking University, and Bian Yanjie, director of the Institute of Empirical Science of Jiaotong University and the School of Humanities were invited to give keynote speeches for the forum.
- President Wang Shuguo had a meeting with Lin Yifu.
- In the forum on the theme of innovating the new model of humanities and economic and trade exchanges in the China (Shaanxi) Pilot Free Trade Zone, free trade experts are specially invited to give keynote speeches.

2. Organize experts to participate in seminars organized by the Counselor's Office of the State Council, Xinhua News Agency, China Economic Information Service, Hainan Provincial Federation of Social Sciences, and government departments and research institutions at all levels.
3. Actively meet the needs of the construction of the pilot free trade zone, conduct research discussions with relevant leaders of the Shaanxi Provincial Government, the First Class of the Central Party School, the Iranian press delegation, etc., and go to the pilot free trade zones in Shanghai, Henan, Sichuan, Chongqing, and Fujian And Sun Yat-sen University Free Trade Zone Comprehensive Research Institute, Guangdong-Hong Kong-Macao Development Research Institute, Zhejiang University Haining International Campus for field visits.
4. Organize and plan various special training activities, invite well-known domestic free trade experts to give a series of knowledge lectures to provincial and municipal government agencies, functional departments, and enterprises, and organize experts to go to various districts and functional areas to carry out consulting services.

4, outlook

In the future, the Free Trade Institute will work with the Shaanxi Provincial Department of Commerce (Provincial Free Trade Office) to jointly promote the construction of the " 1+X+Y " platform of Shaanxi's high-end think tank-the "Belt and Road" Free Trade Pilot Zone Research Institute . By means of the annual salary system of specially-appointed experts, the task system of entrusted tasks, the system of bidding project competition, etc., the layout of think tank tasks ranging from macro-policy trend research to micro-practical reforms, and gradually established covering economic, legal, management, humanities, agriculture, cultural relics and archaeology. Multiple open research centers and a stable team of strategic consulting experts serve the needs of Shaanxi's socio-economic development through the five functions of strategic research, decision-making advice, talent training, public opinion guidance, and public diplomacy, and provide Shaanxi's voice at the national level. Plan, contribute to the wisdom of Shaanxi, and make due contributions to the great rejuvenation of the Chinese nation.

1. Introduction

The Language, Culture and International Exchange Research Center is supported by the first-level disciplines of foreign language and literature, centered on the national "One Belt One Road" and "Cultural Going Out" strategy, in accordance with the requirements of "face to the frontiers of world science and technology, face the main economic battlefield, and face major national needs" Set up, aiming at the forefront of international academics, taking the language and cultural system of the information age as the object, insisting on the road of interdisciplinary and differentiated development, and striving for the integration of multiple disciplines. Through the establishment of two institutes, two platforms, and one center, a subject-oriented research direction and team are formed. While vigorously developing existing superior research directions, it also explores and cultivates new subject growth points.

Of which 2 research institutes

1. Director Wang Min, Frontier Research Institute of Foreign Languages and Literature Email: zjdxwm@126.com
2. Director Guo Jirong International Public Opinion and Cultural Security Strategy Research Institute EMAIL: guojr@mail.xjtu.edu.cn

2. Location

The total area of the Language, Culture and International Exchange Research Center: 2,100 square meters, located in Building No. 5 (Huge Structure).

3. Resident scholars

A total of 0 academicians, 16 professors, and 17 associate professors have settled in the Language, Culture and International Exchange Research Center.

Professor Profile:

Jiang Yue is a professor and doctoral supervisor at the School of Foreign Languages, Xi'an Jiaotong University. In 1978, he was admitted to the Department of Foreign Languages of Air Force Engineering University; in 1982, he stayed on as a teacher with outstanding academic performance; in 1985, he was admitted to the People's Liberation Army Foreign Languages Institute as a postgraduate; after graduation in 1988, he was introduced to the Fourth Military

Medical University; in 2003, he was introduced to Xi'an Jiaotong University. He is currently a professor at the School of Foreign Languages of Xi'an Jiaotong University. He has long served as a master's and doctoral tutor in foreign linguistics and applied linguistics. He has published more than 40 papers in CSSCI journals. He was a Fulbright scholar and a high-visiting scholar of the China Scholarship Council in 2005, 2011, respectively, went to the United States Department of Linguistics, University of Pennsylvania and the University of Edinburgh visit the school, presided over the national Social Science Fund project 2, Ministry of education Social Science Fund project 2 items Shaanxi Province Social Science Fund project 4 particular; presided over the provincial excellent course 1 Men, 3 school-level teaching reform projects; successively named school-level teaching teacher (2008) and provincial-level teaching teacher (2011), and won the Baosteel Excellent Teacher Award (2013). Research direction: corpus translation, quantitative linguistics, text data mining, translation style and translator's style, human-machine translation comparison.

Ma Xiaomei, professor and doctoral supervisor. Now working in the Foreign Language Research Center of the School of Foreign Languages, Xi'an Jiaotong University. Concurrently serving as the executive director of the China Education Linguistics Research Association, the National Social Science Foundation Communication Review Expert, the postgraduate teaching supervision expert of Xi'an Jiaotong University, the first batch of members of the Shaanxi Provincial High-level Talent Development Promotion Association, the Academic Committee, the Degree Committee, and the Teaching Committee of the School of Foreign Languages of Xi'an Jiaotong University And members of the Personnel Committee. Senior visiting scholar at the University of Maryland in the United States and the University of Western Sydney in Australia. Long engaged in linguistics and applied linguistics research, good at language diagnosis and assessment, language learning strategies and other research. He has presided over the provincial project more than 10 remainder, including the National Social Science Fund 2, Ministry of education Humanities and Social Science Fund 1 items, the National Educational Science Planning Fund 1 items. Published more than 30 papers in journals such as "Foreign Language Teaching and Research", "Modern Foreign Languages", "Foreign Language Teaching", "Foreign Languages and Foreign Language Teaching", "Journal of PLA University of Foreign Languages", "System", and edited and participated in publishing academic and teaching He has written (translated) more than 10 books, and has won more than 10 teaching and research awards, including 1 Outstanding

Project Award from the Ministry of Education Online Education Award Fund , and 3 Humanities and Social Sciences Outstanding Achievement Awards in Shaanxi Province . Train more than 50 graduate students, research directions: language assessment and technology, language teaching, learning strategies, learning styles, etc.

Yang Ruiying, PhD, Professor, PhD supervisor, enjoys special government allowances from the Ministry of Education, winner of the Wang Kuancheng Education Award of Xi'an Jiaotong University; Bachelor of English Language and Literature from Northwestern University, Master of Arts from University of Birmingham, Ph.D. from National University of Singapore, 2006-07 Fulbright Research scholar; research interests include discourse / genre analysis, academic English teaching research, corpus linguistics; won two second prizes for outstanding achievements in humanities and social sciences of universities in Shaanxi Province; presided over one project from the Ministry of Education and the National Social Science Foundation, editor in chief Co-edited 11 textbooks , published two monographs, and published more than 20 papers. In 2017, he served as the judge of the "First Shaanxi Children's TV Poetry Competition". In 2018, the editor-in-chief of "Poetry New Youth". In 2019, he served as the director of the Sino-Japanese Poetry Research Institute. Held five times in Tokyo, Japan a special "Kinzhong Chinese Poem Recitation". Committed to poetry creation, comment, recitation, international exchange and social popularization.

Zhang Changan, male, Ph.D., professor, doctoral tutor, is currently the deputy dean of the School of Foreign Languages and the director of the Japanese Studies Center. The research direction is cultural linguistics, translation theory and practice, international relations, etc. At present, he mainly undertakes courses such as "Japanese Traditional Culture" and "Japanese Contemporary Society" for undergraduates and academic postgraduates "Japanese Cultural Studies" and

"Communication Linguistics", "Japanese Diplomatic Interpretation" and "Japanese Interpretation Workshop". In recent years, he presided over the National Social Science Fund, Ministry of Education project, the Shaanxi Provincial Science Planning Projects each 1 term and Xi'an Municipal Government Foreign Affairs Office two horizontal issues, participate in national and provincial education reform and ministerial research projects 6, monographs, textbooks 8 books, participated in the compilation of 2 national planning textbooks, 4 monographs, and published more than 20 academic papers. The completed horizontal topics were adopted by the foreign affairs departments of the provincial and municipal governments. Instructed undergraduate students to win 2 special prizes in the National Japanese Composition Competition, and instructed graduate students and undergraduates to win 1 third prize each in the National Excellent Japanese Master and Undergraduate Thesis Competition.

Wang Hongli, professor and doctoral supervisor of the School of Foreign Languages, Xi'an Jiaotong University, 2009-2010 senior visiting scholar at the University of Florida; Bachelor of Science and Technology English, Master of Foreign Linguistics and Applied Linguistics, Shanghai International Studies University, Ph.D., Shanghai International Studies University; Interests include corpus linguistics, text linguistics, international public opinion analysis, national external communication and image construction, English teaching research, etc.; as the first author or corresponding author, published nearly 20 high-level academic papers, including CSSCI source journals and Chinese core papers 10 ; published monographs 1 Bu; textbooks 7 book, edited 9 Ben; as the first person to complete Shaanxi Province teaching achievement prize 1 items Shaanxi college of Humanities and Social sciences outstanding achievement award three prize 1 items Shaanxi Province Graduate teaching and research achievements of outstanding foreign language education prize, third prize 1 items, Xi'an Jiaotong University teaching achievement first prize, second prize of 1 particular; presided over the national Social Science Fund project 1 , the State Ethnic Affairs Commission of national research project 1 item, Ministry of Foreign Affairs project 1 items, Xi'an and social science planning fund project 1 items, Shaanxi Province Education Science "Twelfth five-Year plan" project 1 , university projects 10 remainder.

Wang Min is a professor and doctoral supervisor at the School of Foreign Languages, Xi'an Jiaotong University, and the director of the Institute of Frontiers of Foreign Languages and Literature. In 2008, he received a doctorate degree from Guangdong University of Foreign Studies.

Morley research scholar and visiting scholar at the University of Michigan in the United States. The current executive director of the China Second Language Acquisition Research Professional Committee, his main research interests include: language acquisition research from the perspective of complex theory, continuation theory, second language structure initiation, corpus-based academic English writing research, etc. He has published papers in well-known linguistic journals Applied Linguistics, "Modern Foreign Languages", "Foreign Language Teaching" and other magazines. The past five years, presided over the National Social Science Fund Project 1, provincial project 3, university projects 2 items as the main participants in national social science fund major project 1, Ministry of education key disciplines base of major projects 1 item provincial project 2, publication monograph 2, editor or editor of materials 8 department. He has won the second prize of National Teaching Achievement Award, the "Wang Kuancheng Education Award" of Xi'an Jiaotong University, the third prize of Shaanxi University Humanities and Social Sciences Outstanding Achievement Award, and the second prize of Shaanxi Province Excellent Teaching Achievement Award.

Zhang Wenli is a professor and PhD in the Japanese Department of the School of Foreign Languages, Xi'an Jiaotong University. Standing director of China Japanese Language Teaching Research Association. Since 1993, he has taught in the Japanese Department of Xi'an Jiaotong University, engaged in the teaching of Japanese undergraduates, postgraduates and public courses. Received a PhD in Japanese Language Education in 2010 (Graduate School of Japanese Policy Research). The research field is Japanese education research. In recent years, he has focused on the construction of online foreign language learning and mobile foreign language learning resources and learning analysis. Presided over the 2018 National Social Science Fund General Project "Research on the Effectiveness of Foreign Language Online Learning in the Chinese Context"; presided over the 2012 Ministry of Education Humanities and Social Sciences General Project 1 "Japanese Interlanguage System Explicit Knowledge and Tacit Knowledge Test System Establishment and Application Research"; presided over the 2016 Shaanxi Higher Education MOOC "Online Course Construction of "University Japanese" teaching reform project; presided over a number of horizontal topics such as " iSmart Course Resource Construction Participation". Published monographs and published many papers. The paper "Exploration of New Classroom Teaching Models for Japanese Majors in Colleges and Universities" won the second prize of the 2nd China Japanese Language Teaching Research Association Excellent Academic Paper Award.

Compile a number of textbooks, including the editor-in-chief of "Twelfth Five-Year Plan Textbook for General Higher Education" and "New University Japanese Standard Course 2 " (Second Edition, 2016 , Higher Education Press), Xi'an Jiaotong University 2017 "Famous Textbook" Project. Participated in the compilation of several "Tenth Five-Year Plan" teaching materials. Editor-in-chief of "New Japanese Extensive Reading Course" 1-4 (2018-2019, Higher Education Press). Awarded in various teaching competitions at all levels and won 2016 Shaanxi Province Special Prize and National Second Prize in China Foreign Language Micro-Class Contest in 2016 ; Second Prize in 2017 Shaanxi Provincial College Teachers' Micro-Class Teaching Competition.

Tian Mei, professor at the School of Foreign Languages, Master and Ph.D. in English Language Teaching at the University of Bath (fully funded by scholarship). Selected as a young backbone teacher of Xi'an Jiaotong University from 2009 to 2011, and visited University College London in 2012-2013 for visiting study / postdoctoral research. Presided over the country, the Ministry, provincial and school level topic 10 items. As the first / independent author, he published 30 academic papers in Teaching in Higher Education, Journal of Studies in International Education, Assessment and Evaluation in Higher Education, Compare a Journal of Comparative Education, and read more than 10 papers in English at international academic conferences, The English papers are cited approximately 250 times internationally. Served as an external reviewer for famous journals such as Higher Education, Studies in Higher Education, Intercultural Education. Won a third prize of the Shaanxi University Humanities and Social Science Research Outstanding Achievement Award (first prize winner). Research interests: language and cultural identity of foreign students and immigrant groups, English academic paper writing and international journal publication from a cross-cultural perspective, qualitative research methods, etc.

Pang Jiaguang is a professor at the School of Foreign Languages of Xi'an Jiaotong University and an academic master tutor. In 2014, he graduated from the School of Foreign Languages of Nanjing University with a doctorate degree in English language and literature. His research interests are cognitive linguistics and theoretical linguistics. Current research interests include the study of Chinese argument structure, function words and parts of speech. Published academic monographs "Research on Chinese Noun Predicate from the Perspective of Cognitive Grammar" (Xi'an Jiaotong University Press, 2015) and "Research on Chinese Cognitive Syntax" (Science

Press, 2017), in Modern Foreign Languages, Nearly 20 papers have been published in core journals such as Contemporary Linguistics, Language Teaching and Research, Foreign Language Teaching, and Journal of PLA University of Foreign Languages , presided over 3 provincial and ministerial projects , and served as anonymous reviewers for multiple core journals.

Wang Hua, PhD in economics, professor, master's supervisor, deputy director of the two offices of Xi'an Jiaotong University (suspended post). He has been teaching and researching for 20 years in the School of Foreign Languages of Xi'an Jiaotong University and Shaanxi Provincial Key Philosophy and Social Science Research Base "One Belt One Road" and the Global Development Research Institute. He has published nearly 30 papers in important domestic and foreign journals, presided over and participated in more than 10 projects, edited and edited materials. 5 book, ed. 3 book. He is also the Chair Professor of the UNESCO International Engineering Science and Technology Knowledge Center (IKCEST). In recent years, he has been to Southeast Asia, Central Asia, Russia and other Belt and Road regions and countries to give academic lectures and exchanges, and provide academic lectures and exchanges for the Ministry of Foreign Affairs, the Ministry of Education, the Liaison Office, etc. Organized a delegation of American university presidents, a delegation of ASEAN diplomats, a delegation of European college students, visiting scholars and students from Hong Kong, Macao and Taiwan, and local financial institutions such as the Shaanxi Branch of the Export-Import Bank of China to give academic and scientific lectures on the Belt and Road and regional economic fields. Participate in the international conference on the Belt and Road issues and speak.

Sang Zhonggang, Ph.D., professor of Xi'an Jiaotong University, supervisor of doctoral students. Research direction: translation studies, pragmatics, narratology. He has studied at Lanzhou University, Guangdong University of Foreign Studies, Hong Kong Polytechnic University, and a visiting scholar at Aston University in the UK. Respectively in Perspectives : Studies in Translatology ("Perspective: Translatology Research"), Social Semiotics (" Social Semiotics "), "Foreign Language Teaching and Research", "Foreign Language", "Chinese Foreign Language", "Foreign Language Teaching Theory and Practice" , "Foreign Language Studies", "Journal of the People's Liberation Army University of Foreign Languages" and other linguistics, translation studies authoritative, core journals published more than 20 papers, editor-in-chief and co-editing many books, presided over and participated as key personnel to complete the national, provincial

and ministerial level A number of scientific research projects. Presented many papers in international academic conferences such as the "18th World Translation Conference", The 8th International Conference of Free Linguistics (the 8th Interdisciplinary Linguistics Conference). He has served as a reviewer for academic journals such as Journal of Translation ("Translation Studies") and "Journal of PLA University of Foreign Languages". Director of the Chinese Comparative Literature Translation Research Association, Director of the China-English-Chinese Comparative Research Association, Standing Director of the Traditional Culture Communication and Translation Research Association of the National Chinese Medicine Research Promotion Association, Expert Member of the Chinese Translation Association, Member of the SIL Linguistic Research Association, National Social Science Planning Project Review experts.

Cao Hongquan, Professor and Ph.D., Department of Japanese, School of Foreign Languages, Xi'an Jiaotong University. The research fields are corpus linguistics and Chinese-Japanese comparative linguistics. Presided over a number of projects of the Ministry of Education, Shaanxi Province and school level. Constructed a corpus of learners, conducted interlanguage analysis and applied it to teaching practice. Published 2 monographs, edited 2 textbooks, and participated in the compilation of 6 national planning textbooks. Won the first prize of Xi'an Jiaotong University's lecture competition. At present, I am concerned about the study of Japanese issues based on text mining.

4. Platform and achievements introduction

1. Summary of research platform information
2. Summary of awards received in the past five years.

5. Outlook

1. Short-term target 2020 Nian

Initially formed a team of leading scholars as leaders, academic backbone youth as the main body of full-time research team; 1 level of scientific research institutes close to the advanced world, 1 a domestic first-class research institute. The institute as a whole has reached the level of Grade B in foreign language and literature subjects.

2. The medium-term target 2025

The Institute has significantly improved in terms of talent training, academic influence, high-level faculty, and internationalization, and has reached the level of B+ in foreign language and literature as a whole.

3. The long-term goal of 2035 Nian

The Institute has a group of internationally renowned scholars and experts, and has established a language and culture research system with Jiaotong University characteristics, and has reached the level of foreign language and literature A-level as a whole, and has entered the domestic first-class.

Institute of Public Policy and Development (5th and 6th floor building 5)

(For Chinese full version visit: <http://iharbour.xjtu.edu.cn/gzcyfzyjy.htm>)

Contact number: +86 29 88965659 Contact email: ggxy@mail.xjtu.edu.cn

1. Introduction

The Institute of Public Policy and Development adheres to the concept of "learning from one hundred scholars and acting in the world", adhering to the tenet of "Chinese issues, international vision, and serving the society", paying attention to the major needs of society and the country, taking China's actual problems as the orientation, and actively Carry out research on the reform of public management discipline system and mechanism in line with China's national conditions, through the intersection of different disciplines and the integration of public management disciplines, aiming at major national needs and carrying out research in emerging fields. Four entities set up under the Institute of Population and Development Research Institute, Institute for Government Innovation management and governance, social development and Social Security Institute, Institute of Health Management and Policy, as well as 10 more than research centers.

Up to now, the Institute has undertaken more than 90 national fund projects, including 7 major projects of the National Social Science Foundation, 2 major research projects of philosophy and social sciences of the Ministry of Education, 9 key projects of the National Social Science Foundation, and National Natural Science Foundation of China. There are 42 scientific fund projects, 47 national social science fund projects, and 29 high-level international funds and

international cooperation projects. Published 142 SCI , SSCI , A&HCI papers , authoritative journal papers and 4 theoretical articles in three newspapers and one journal , 54 high-level academic monographs , and more than 10 think tank results approved by the state and provinces . Research results in multiple research fields have received important approval and affirmation from central and local leaders, and have had a positive impact on related public policies.

At the same time, the Institute has established substantive cooperation and exchange mechanisms with high-level foreign research institutions such as Stanford University, Harvard University, Yale University, Victoria University of Canada, Kyoto University of Japan, etc., aiming to improve the public management discipline of our school in international and domestic media And the discourse power and influence of academia.

2. Basic situation

Public Policy and Development Institute, located in China Science and Technology Innovation in Western No.5 giant structure 5 layers, 6 layers West, covers an area of 4700 square meters, equipped administrative offices, meeting rooms, seminar rooms, teaching graduate experimental aircraft position and other functional facilities. A total of 24 professors and 19 associate professors settled in.

Institute Total area: 2300 square meters, located fifth premises (giant structure).

3. Progress of school-local cooperation

Major issues currently striving for:

1. Research on the livelihood and sustainable development of the agricultural transfer population in the process of new urbanization: the core issues and countermeasures of urbanization, the major project of the National Social Science Fund, focusing on the agricultural transfer caused by urbanization while promoting the rapid economic and social development Research on the livelihood and sustainable development of the population and the new opportunities and challenges facing them.

2. Innovative research on the theory of census quality evaluation, a major project of the National Social Science Fund, to study the content of birth, death, and marriage in the Chinese census data.

Design models and analyze the quality of census data through tools such as mathematics and statistics.

3. The prevention-oriented big health pattern and healthy China construction research, a major project of the National Social Science Fund, with the goal of universal health, based on the two focus points of the entire population and the entire life cycle, and centered on health promotion, health management, and environmental health management. The three pillars carry out systematic and in-depth evaluation and research, put forward a prevention-oriented strategic framework for a large health landscape, and solve 70%-80% of health problems from the perspective of prevention, in order to achieve the goal of healthy China.

4. Promote the research on the high-quality development of China's aging cause and industry. The Ministry of Education's philosophy and social sciences major research project will conduct research and analysis in terms of the structure and quantity of elder care service supply, the content and form of elder care service supply, and the elements of elder care service. The promotion and development of

5. Research on natural solutions for urban renewal to enhance functional value and social inclusion. Special key international scientific and technological cooperation projects. In conjunction with Peking University, Tongji, and the National Development and Reform Commission Small Town Center, we will carry out China-Europe cooperative research on urban renewal based on natural solutions.

4. Outlook

The Institute of Public Policy and Development will closely follow the international frontiers of public policy, focus on major national strategic needs and national economic construction, base the west, serve the country, and look at the world, carry out major public policy theory and practical research, and cultivate and gather high-end public policy talents. Promote the modernization of the national governance system and governance capabilities, and become an internationally advanced public policy and management think tank.

Management Research Institute (7TH Floor building 5)

West China Science and Technology Innovation Port Management Research Institute

Management Academy

1. Introduction

The Management Research Institute of Xi'an Jiaotong University is oriented to major national needs, local economic development, focusing on platform construction, giving full play to the functions of university think tanks, making new contributions to deepening reforms and promoting economic and social development of the country.

The Institute will follow the instructions of General Secretary Xi Jinping "Facing the frontiers of world science and technology, facing the main economic battlefield, and facing the major needs of the country", centering on the school's "double first-class" construction goal, with the goal of building a world-class management school, persisting in inheriting innovation and making breakthroughs , Team combat, forming a distinctive and bright highland in scientific research, personnel training, and social services.

The Institute will adhere to the primary goal of cultivating innovative and high-quality talents, emphasizing the integration of talent training, scientific research, and social services; aiming at the international academic frontiers of management disciplines, and conducting forward-looking research in management to meet the major needs of society and the country Orientation, pay attention to the unification of academic and application, increase the intensity of interdisciplinary, realize the integration of knowledge, the combination of inheritance and innovation, and focus on the construction and development of main disciplines; facing the needs of national and local economic and social development, focusing on the innovation and management of management theory The exploration of management practice emphasizes serving the society and promoting the transformation of scientific and technological achievements.

2. Location

The total area of the Management Research Institute: 7000 square meters, located on the 7th floor of No. 5 giant structure.

3. Platforms and Scholars

According to the main body of the research institute / research base, the management research institute is divided into three types: department co-construction research institute, entity construction research base, and public platform research base.

(1) Faculty co-constructed research institute

The Institute of Management relies on two major first-level disciplines, namely management science and engineering, and business administration, with the support of the frontier disciplines of each department as the support of six departments and institutes. The six research institutes are led by Academician Wang Yingluo, Professor Xi Youmin, Academician Xu Zongben, Academician Guan Xiaohong, Academician Yang Shanlin, and Academician Chen Xiaohong. Leading scholars and young top-notch talents serve as directors, and young and middle-aged key teachers in related fields are members.

(2) Entity construction research base

The Institute of Management mainly relies on two ministerial-level think tank platforms: the Ministry of Education's Soft Science Research Base - China Management Issues Research Center, the Reform Pilot Exploration and Evaluation Collaborative Innovation Center (co-built with the National Development and Reform Commission), and the Shaanxi Intelligent Manufacturing Management Soft Science Research Base , China (Xi'an) Digital Economy Dynamic Monitoring and Early Warning Base and other research bases jointly built by several provinces and ministries to establish physical construction research bases, mainly to study and solve common problems of government and society, and key management issues common to industries and enterprises. Affected academic achievements, consultation results with good social benefits. Entity construction research bases are operated as entities, and most of the core members are full-time scientific researchers.

(3) Public platform type research base

The Institute of Management relies on a basic scientific research platform -the "Key Laboratory of Process Control and Efficiency Engineering of the Ministry of Education" to build a public basic platform-based research base to provide resource support, data information construction for colleges and research institutes, and incorporate the management of postgraduate workstation

settings To the public platform research base of the key laboratory. The main personnel of the public platform-type research base consist of experimental technicians.

4, outlook

The Institute will always adhere to the "three orientations": to cultivate innovative and high-quality talents as the first goal, emphasize the unity and coordination of scientific research, talent training, and social services; aim at the international academic frontier of management disciplines and develop management science forward-looking Research; guided by the major needs of society and the country, focusing on the unification of academic and application; facing the needs of economic and social development, focusing on management theory innovation and management practice exploration, emphasizing serving the society and promoting the transformation of scientific and technological achievements. Cultivate a large number of strategic scientific and technological talents, scientific and technological leaders, young scientific and technological talents and high-level innovative teams with international standards. Accelerate the construction of philosophy and social sciences with Chinese characteristics, and build a new type of think tank with Chinese characteristics. Strengthen basic theoretical research, advance forward-looking basic research, and make major breakthroughs in leading original results.
